

MaxiCut® Oil™

34-470LP

A lightweight glove designed for precision handling in oily environments where dexterity and protection are equally critical. Featuring a palm coating that repels oils and improves grip, it delivers EN 388 Cut Level B resistance for tasks involving light to moderate cut risks.

The glove's streamlined design enhances fingertip sensitivity, while GRIPtech® and CUTtech® technologies work together to provide control and confidence when handling slick or sharp components. With a reinforced thumb crotch and skin-safe construction, it's built for comfort and durability across long shifts.

Extended Knitwrist for Extra Protection

Longer cuff keeps out oils, debris, and particulates, enhancing wrist coverage without compromising flexibility.

Enhanced Grip

With an optimised micro-cup finish, GRIPtech® ensures a secure and controlled grip, minimising slippage and increasing safety.

Cut Level C Protection

Built with CUTtech® fibres to deliver robust protection from sharp edges and metal parts ideal for metalwork, maintenance, and machinery tasks.

Form, fit, feel for reduced hand fatigue

Designed to mimic the natural "hand at rest" position, the glove reduces muscle strain and hand fatigue. Combined with an ultra-lightweight liner and smooth, rounded fingertips, it enhances comfort and fingertip sensitivity.
