MaxiFlex® Elite™

34-774B

MaxiFlex® Elite™ Anti-Static is engineered for precision handling in dry environments where static control is essential. Weighing just 14 grams, it remains 30% thinner than standard foam nitrile gloves while offering enhanced breathability and exceptional touch sensitivity.

This version includes electrostatic discharge (ESD) properties, making it suitable for electronics assembly, component handling, or static-sensitive work areas. Lightweight, breathable, and skin-safe, it delivers extreme dexterity without compromising comfort or safety.

360° Breathability thanks to AIRtech®

Featuring our patented micro-foam coating, these gloves keep your hands cool and dry by efficiently channeling moisture and heat away from the skin.

Precision You Can Feel

30% thinner than standard foam nitrile gloves. ERGOtech® delivers ultra-light, form-fitting gloves built for total control in dry conditions.

Form, fit, feel for reduced hand fatigue

Designed to mimic the natural “hand at rest” position, the glove reduces muscle strain and hand fatigue. Combined with an ultra-lightweight liner and smooth, rounded fingertips, it enhances comfort and fingertip sensitivity.

Touchscreen Compatible

Use devices without removing your gloves. Stay connected, efficient, and protected on the job.
