

MaxiChem®

76-830

Chemical-resistant gloves shouldn't be uncomfortable. That's why we created MaxiChem® with TRltech™, combining protection, comfort, and performance like never before. Built with our revolutionary TRltech™ technology, MaxiChem® is 30% thinner and 100% more comfortable, all while maintaining high mechanical performance and Type A chemical resistance (EN ISO 374:2016 + A1:2018).

With a three-layer construction, MaxiChem® offers superior liquid repellence, dexterity, and grip, ensuring hands stay protected without sacrificing flexibility.

Certified Liquid and Chemical Repellency

LIQUltech® provides protection against oils, liquids, and chemical splashes. Ideal for environments where fluid exposure is routine but flexibility is essential.

Reduced hand fatigue

ERGOftech® mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Lightweight TRltech® Construction

Built with ATG®'s TRltech® technology, delivering a unique blend of comfort, dexterity, and barrier protection without the bulk typically associated with chemical-resistant gloves.

Skin-Safe & Ready to Wear

Pre-washed, OEKO-TEX® certified, and dermatologically accredited. Part of ATG®'s HandCare® programme for skin health and user confidence.
