

# MaxiDry<sup>®</sup> Elite<sup>™</sup>

proRange<sup>®</sup>

With a material thickness of just 0.7 mm, the new MaxiDry<sup>®</sup> Elite<sup>™</sup> is the thinnest and lightest assembly glove for oily applications we've ever built.

Certified to be washed.  
CLEAN, FRESH AND COST EFFECTIVE

## TECHNOLOGIES INSIDE

### Keeping hot hands cool, dry and productive

The AD-APT<sup>®</sup> Technology is activated by the movement of your hands and increased temperature within the glove, releasing a natural cooling agent that keeps your hands dry and make them cooler. It's designed to last for the duration of the glove and can be laundered.

### For protection against oils and hazardous chemicals

In everyday workshop life, your hands can encounter a variety of substances, including cooling lubricants, oils, greases, and hazardous chemicals. Our LIQUtech<sup>®</sup> barrier is specifically designed for these situations.

We dip the oil-repellent or chemical-resistant LIQUtech<sup>®</sup> coatings exclusively onto specially matched carrier materials. This ensures the coating remains flexible and comfortable, while the special material composition protects your hands from a wide range of common cleaning agents and additives.

LIQUtech<sup>®</sup> – probably the most comfortable protective layer against harmful liquids.

### Reduces hand fatigue

**Ultra lightweight** - synthetic coating combined with an industry leading super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity.

**Locking cuff** - ensures the glove doesn't slip on the hand: an exclusive elasticated support in the wrist area provides a "locking" effect for a close and snug fit.

### For a secure grip

Our micro-cup non-slip grip finish allows for a controlled and superior grip in oily and wet applications. The nonslip grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised. GRIPtech<sup>®</sup> decreases hand fatigue and increases safety.

## CLEANLINESS GUARANTEED

Cleanliness and hygiene are fundamental components of our product philosophy. We always do our best to ensure your safety.

We play it safe when it comes to your health. That's why all our products are tested and accredited by dermatologists and doctors from the Skin Health Alliance. We wash our products prior to packaging them to remove even the smallest traces of production residues.

To ensure none of our materials pose a risk to your health, almost all of our products are also certified according to the OEKO-TEX<sup>®</sup> Standard 100. We only use REACH-compliant raw materials and additives and none of our products contain SVHCs.

We do everything we can to make sure ATG<sup>®</sup> gloves are kind both to users' skin and to the planet. We call this: HandCare<sup>®</sup>.

Reducing emissions is a top priority for us and we do our utmost to achieve our goals. But you can benefit from this too, because our mechanical gloves can be washed several times. This not only saves you money, but also reduces the consumption of valuable resources.

Hand protection by ATG<sup>®</sup> – skin-friendly gloves guaranteed.
