

# MaxiDry<sup>®</sup> Elite<sup>™</sup>

With a material thickness of just 0.7 mm, the new MaxiDry<sup>®</sup> Elite<sup>™</sup> is the thinnest and lightest assembly glove for oily applications we've ever built.

proRange<sup>®</sup>

**Certified to be washed.**  
**CLEAN, FRESH AND COST EFFECTIVE**

## TECHNOLOGIES INSIDE

### Keeping hot hands cool, dry and productive

The AD-APT<sup>®</sup> Technology is activated by the movement of your hands and increased temperature within the glove, releasing a natural cooling agent that keeps your hands dry and make them cooler. It's designed to last for the duration of the glove and can be laundered.

**LIQUITECH<sup>®</sup>**

### For protection against oils and hazardous chemicals

**Liquid repellence** - we have increased resistance to oils via our LIQUITECH<sup>®</sup> technology platform.

**ERGOTECH<sup>®</sup>**

### Reduces hand fatigue

**Ultra lightweight** - synthetic coating combined with an industry leading super light seamless knit liner provides excellent comfort, sensitivity, fit and dexterity.

**Locking cuff** - ensures the glove doesn't slip on the hand: an exclusive elasticated support in the wrist area provides a "locking" effect for a close and snug fit.

**GRIPTECH<sup>®</sup>**

### For a secure grip

Our micro-cup non-slip grip finish allows for a controlled and superior grip in oily and wet applications. The nonslip grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised. GRIPTECH<sup>®</sup> decreases hand fatigue and increases safety.

## CLEANLINESS GUARANTEED

We use our HandCare<sup>®</sup> Program for every single ATG<sup>®</sup> product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex<sup>®</sup> according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG<sup>®</sup>'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

**More information about HandCare<sup>®</sup> by ATG<sup>®</sup> is available at [www.atg-glovesolutions.com](http://www.atg-glovesolutions.com).**
