proRange<sup>®</sup>

MaxiDex<sup>®</sup> Elite<sup>™</sup> combines the best features of precision-handling and disposable gloves in one groundbreaking solution.

## TECHNOLOGIES INSIDE

### For protection against oils and hazardous chemicals

In everyday workshop life, your hands can encounter a variety of substances, including cooling lubricants, oils, greases, and hazardous chemicals. Our LIQUIttech<sup>®</sup> barrier is specifically designed for these situations.

We dip the oil-repellent or chemical-resistant LIQUIttech<sup>®</sup> coatings exclusively onto specially matched carrier materials. This ensures the coating remains flexible and comfortable, while the special material composition protects your hands from a wide range of common cleaning agents and additives.

LIQUIttech<sup>®</sup> – probably the most comfortable protective layer against harmful liquids.

### Reduces hand fatigue

No two hands are the same – they're as individual as we are. Our gloves must therefore adapt to suit every hand. To do this, our gloves imitate the natural shape of your hands. Even the dipping moulds we use imitate the resting position of the hand in order to reduce tension in the material to a minimum when the glove is worn. But that's not all.

Our gloves always include a knitted liner and a coating, which guarantee maximum flexibility when combined. In addition, the coating does not come into contact with your skin when the gloves are worn. In order to protect as many individual hands as possible, we offer sizes 5 (XXS) to 12 (3XL) in our current portfolio.

ERGOtech<sup>®</sup> is an essential part of all our proRange<sup>®</sup> gloves, so you'll always find the right pair for your hands. They'll feel like a second skin – with outstanding flexibility, dexterity and tactile sensitivity.

## CLEANLINESS GUARANTEED

Cleanliness and hygiene are fundamental components of our product philosophy. We always do our best to ensure your safety.

We play it safe when it comes to your health. That's why all our products are tested and accredited by dermatologists and doctors from the Skin Health Alliance. We wash our products prior to packaging them to remove even the smallest traces of production residues.

To ensure none of our materials pose a risk to your health, almost all of our products are also certified according to the OEKO-TEX<sup>®</sup> Standard 100. We only use REACH-compliant raw materials and additives and none of our products contain SVHCs.

We do everything we can to make sure ATG<sup>®</sup> gloves are kind both to users' skin and to the planet. We call this: HandCare<sup>®</sup>.

Reducing emissions is a top priority for us and we do our utmost to achieve our goals. But you can benefit from this too, because our mechanical gloves can be washed several times. This not only saves you money, but also reduces the consumption of valuable resources.

Hand protection by ATG<sup>®</sup> – skin-friendly gloves guaranteed.
