

INTEGRATED POLICY FOR QUALITY, ENVIRONMENT, ENERGY, HEALTH AND SAFETY

The business management philosophy and practice of ATG Group is,
To encourage consultation and participation of worker representatives in order to
Harness the human and material resources at its disposal in the most efficient and
effective ways to ensure that,

We continually fulfill the needs and expectations of our interested parties while
providing safe and healthy working conditions for the prevention of work related
injury and ill health to people.

We shall demonstrate our ability to consistently meet and exceed the applicable
Legal and other requirements, Together with

Commitment to enhance customer satisfaction of all interested parties and
continual improvement of the performance of integrated management system by
establishing and reviewing objectives and improving the performances of quality,
environment, energy, and health & safety

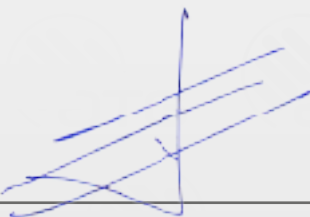

Ensures that all activities are conducted in a way that protects the environment,
prevents pollution and eliminates workplace hazards.

We are committed to the sustainable use of natural resources, minimizing waste,
promoting reuse and recycling, considering life cycle perspectives in our products
and services, reducing environmental impacts including greenhouse gas emissions
where applicable, fulfilling all applicable environmental compliance obligations,
and continually improving our environmental performance.

We shall ensure the purchase of energy-efficient products, services, and designs
that improve the overall performance.

We shall contribute towards sustainable development by using best practices and
innovative solutions to minimize environmental impact

We shall be fully committed to the above policy and shall provide the enabling
environment for its success.
