

Material Safety Data Sheet

MaxiTherm[®] 30-202

General description

For general handling in cold conditions. Made with natural latex on a synthetic liner with a patented non slip grip coating.

Compliances

Gloves conform to the requirements of PPE Directive 89/686/EEC and to the European standards EN 420: 2003 + A1: 2009, EN 388: 2003, EN 511: 2006, EN 407: 2004.

Use

Mechanical work glove with thermal resistance in cold or warm and dry or wet environments. Can be used for temperatures down to -10°C at high activity. Lower activity limits the thermal properties.

For detailed applications where this product can be used please consult the ATG[®] website at <http://www.atg-glovesolutions.com>.

Main ingredients

Coating: NRL (Natural Rubber Latex)

Liner: Acrylic, Polyester

Hazardous ingredients

REACH

All ingredients used in the manufacturing and construction of this product are compliant with the EU directive for the "Regulation of chemicals and their safe use" more commonly known as REACH -- EU directive EC1907/2006. REACH stands for "Registration, Evaluation, Authorisation and Restrictions of Chemical substances". The key aim of REACH is to provide high levels of protection to human health and the environment. More information can be found at:

http://ec.europa.eu/environment/chemicals/reach/reach_intro.htm.

Oeko-Tex[®]

This product has been tested and successfully passed the Oeko-Tex[®] Standard 100 global standard which indicates that the product is skin friendly. Look for the Oeko-Tex[®] logo to make sure you are buying a skin safe product. For more information on Oeko-Tex[®] please visit http://www.oekotex.com/oekotex100_public/index.asp?cls=02.

Precautions for use

Before usage, inspect the glove for any defects or imperfections. If a glove is ripped or punctured during use dispose them immediately. Wear an appropriate size and do not wear gloves that are too tight or too loose.

Material Safety Data Sheet

MaxiTherm[®] 30-202

Storage requirements

Store in a cool, dry place which is away from direct sunlight and/or heat. Extended exposure to direct sunlight or excessive heat will reduce shelf life and resulting in fading, discoloration and cracking. Normal anticipated shelf life is 5 years.

Disposal

After the glove has been used it may be contaminated with infectious or other hazardous materials. Please dispose according to local authority regulations.

Fire notes

Gloves will decompose at high temperatures. Extinguish using water, CO2 spray or dry powder.

First aid

Remove contaminated gloves. Skin contact: if an allergenic reaction occurs seek medical advice immediately. Eye contact; rinse thoroughly with low pressure water. If any prolonged discomfort, seek medical advice immediately.
